

# Coburn Farms

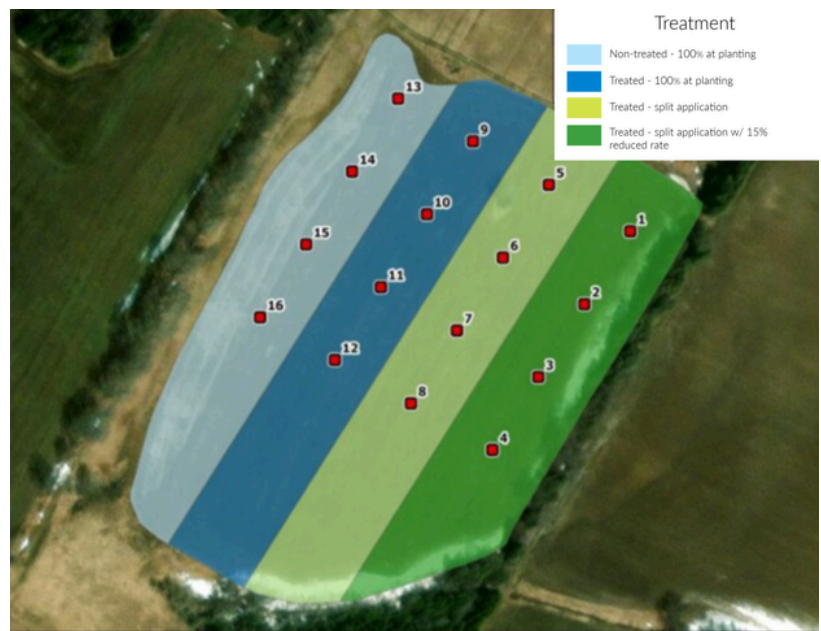

## Keswick Ridge Advance Nitrogen Management

### About the Farm

#### Management Practices:

- 4R Nutrient Management
- Urease and Nitrification Inhibitors
- Split Applications
- Reduced Rates, Pollinator Strips

Coburn Farm is a fourth-generation farm with a longstanding and diverse operation. Father David was heavily active in farming politics and passed on the farms to brothers Tyler and Glen.

Tyler Coburn is the chair of the New Brunswick Soil and Crop Improvement Association, and both brothers give back as part of the New Brunswick Young Farmers Forum.

They farm on top of a ridge as well as at the bottom of a valley, providing a variety of environmental factors. Coburn farm has a longstanding diverse and fully integrated operations including an apple orchard, grain and oilseed cropping, corn, compost production and sale, layer chickens and beef.
